Theme of the Webinar

In the present century, we are living in an era of pollution of all types. Prevention of pollution is an uphill task before mankind. At present we are faced with an unprecedented crisis in the form of corona virus. One can only sense that the world will be faced with such more crises than ever in future. The sages of yore had a vision of life. They strongly pleaded for preventing mind from pollution. If the mind is purified, they argued, other types of environmental pollution can be minimized, if not totally prevented. Our 'Vedas' are the repository of human knowledge for human beings. They contain the nuances of integrated approach where knowledge, emotion and action are unravelled to enable the individual and the group to lead a healthy and purposeful life. Our International Webinar would deliberate on the central idea of combating with corona virus through the ancient science of Ayurveda.
