Plantation of saplings which have high co2 consumption rate, 2020

The Department of Physical Education at Mugberia Gangadhar Mahavidyalaya organized a sapling plantation programme on January 17, 2020. The Principal of our institution delivered a lecture to students about trees with a high CO₂ consumption level. Teachers and students actively participated in planting trees at various locations within the college premises. As a conclusion to the event, different tree saplings, known for their high CO₂ consumption rate, were distributed among the students. This initiative aims to contribute to environmental sustainability and raise awareness about the importance of tree plantation for a greener future.
