Annual Report of E-Governance

Year – 2018-19

Brief Description of E-governance

1.Website and social media: The website of the college reflects the face of the college to a global audience, hence was continuously updated since its creation.

2. Hosting and deployment by a third party should be on a secure platform ensuring the privacy of data.

3. Regular maintenance & proper training should be imparted to the existing staff of the college and staff should be identified as the technical assistant in charge of the process.

4. Student management: From admission to issue of transfer certificate should be managed with a suitable ERP solution

5. Academics: Student progress in the internal and university end semester examination will be documented electronically.

6. Finance and accounts: For case of maintaining accounts and finance, a suitable accounting and Finance software package should be used and approval by the government of West Bengal and UGC to be implemented for free and fair practice.

7. Library: Library system with respect to issue & return reference is to be automated and staff and students to access the library resource in and outside the campus. Subscription to INFLIBNET, OPAC and other access to e journals and e resources will be provided on campus.

8. Campus management procured.: ICT enabling is of prime importance and updated elements software will be periodically procured

Annual E-governance Report: 2018-19

E-governance has been put into place by Mugberia Gangadhar Mahavidyalaya in order to share information and manage human resources effectively, transparently, and with accountability from all stakeholders. The college's Enterprise Resource Planning (ERP) is divided into two main sections, such as e-administration and e-services. E-administration makes use of ICT to facilitate information processing and decision-making for the institution's head, IQAC, governing body, and other committees established to decentralize administration. E-service offers a range of service options.

Utilizing the advantages of contemporary technologies available in the sphere of higher education, the majority of faculty, staff, and students use smartphones. The responsibility for maintaining various forms of e-governance through e-tender processes has been placed on the businesses known as Jana Technologies, Plug & Play, Infolite, Jana Cable network, and OJAS. Automation was used to create the student database, exam, attendance tracking system, and continuous assessment record. A different supplier has been chosen to offer the assistance required for upkeep of the college website. The Central Library has established a specialised online e-book gateway. Students had access to INFLIBNET in the library as well. To access books and journals, students must first register by filling out this gateway with their personal information.

To share instructions, information, and discussions on a single platform, each academic department and the university have established a specialised WhatsApp group. The college provides the required financial allocations for the implementation of various government programmes and digital awareness, and it guarantees proper utilisation with the highest transparency within the allotted time frame. Below are some examples of how e-governance is being used in various industries.
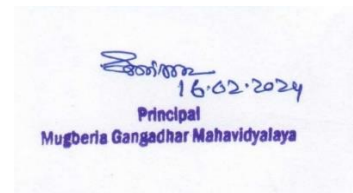

ADMINISTRATION: All departments and faculty members have their own subdomain on the college website. The Government portal is used to call for all tenders. The college website

publishes all notices. Documentation pertaining to retirement is submitted using an electronic pension site.

FINANCE AND ACCOUNT: The Finance section is fully automated. The salary grant received from Govt, and its disbursement is done through HRMS. College accounts are also automated.

STUDENT ADMISSION AND SUPPORT: Admission process is fully automated from submission of forms to payment of fees. Fees are collected online (linked via Billdesk) E-brochures made available online free of cost. Admission register is generated. Most of the ICT based classrooms are wi-fi connected. Students can make complaints about any grievance through online mode. For all kinds (Govt & NGO) students' scholarships, the college administration used an online portal for filling out applications etc.

EXAMINATION: All exam registrations are made online via affiliating University portal. Selection of subjects in CBCS program is done through an online process. Marks are uploaded in affiliating University portal. Registration and admit card issuing are fully automated. Internal assessments are conducted through offline/online mode. A dedicated portal serves the internal examination process conducted by affiliating University.
